EUROCOPERT®

ECOMAX® PREMIUM

In order to meet our customers' expectations and growing market demand for ecological products, we have decided to launch very unique and prototype production of fully paper protective envelopes called **Ecomax Premium®**.

ECOMAX® PREMIUM

The **Ecomax Premium®** is a series of totally plastic free, high-quality protective envelopes with a company imprint, available in 11 sizes and in two colors – white and brown.

Being eco-friendly, **Ecomax Premium**® paper protective envelopes are intended for shipping and storing sensitive and vulnerable items (including floppy disks, CDs, electronic components, mobile phones, jewelry, gifts, documents, books, etc.).

20/K	350x470	370x480	50
CD	180x165	200x175	100

Ecomax Premium® envelopes can be fully recycled, without necessity to separate all kinds of waste, just like in standard air bubble envelopes with foil inside.

It is possible to identify the envelope using printed markings, such as a given product brand, the envelope symbol or its bar code. **Ecomax Premium**® envelopes are packed into bleached cardboard collective boxes, with a neutral print. We also offer packing these envelopes into packs of few pieces with a paper band.

Envelopes are made of 6 layers of strong uncoated paper, which enhances resistance to damage of the envelope content.

The interior of envelopes is lined with a protective flexible double layer of a 100gsm paper bubble insert, which stiffens the envelope, deadens shocks, prevents from scratches, creases and breaking.

Very strong hot melt glue is placed on the straight or trapezoid-shaped closing flap of the envelope.

The durable, wide and aesthetic seal on the two side edges of the envelope and fully lined with protection layer bottom prevents it from being torn apart.

Production and sale of **Ecomax Premium**® envelopes is with accordance with the standard PN-EN 13427 (DECLARATION OF CONFORMITY with the essential requirements of Directive 94/62/EC) and FSC® certified – license number: FSC® C043072.

Energy used for production comes in 100% from our photovoltaic power plant, thanks to Certified CO2 emission measurement tools and emission full offsetting, **Ecomax Premium**® and its production process is CO2 Neutral certified with ClimateCalc™ ISO 14064-1 / ISO 16759.
