

Material-Data sheet

Product Multipurpose labels

Facematerial	
Description	Matt, woodfree machine finished paper, providing good opacity. The paper is based on ECF pulp.
Thickness	70 µm
Weight	73 g/m ²
Adhesive	
Description	Modified acrylic dispersion
Performance	Semi permanent, repositionable
Coating weight	21 g/m ²
Liner	
Description	One side silicon coated kraft paper, yellow Amount of silicon = 0,5 – 1,0 g/m ²
Thickness	86 µm
Weight	80 g/m ²
Laminate	
Thickness	168 µm
Weight	174 g/m ²
Service temp.	-20°C bis +60°C
Min. application temp	+5°C
Optimal storage conditions	23°C / 50 % r.h.
Packaging	
Material	Cardboard GD2 Recycled, 350 g/m ² ; 50 µm PET film
Recycling	
Face / liner	All components use environment friendly components. The liner is neutral, does not contain dangerous or water contaminating components and can be added to the normal paper recycling process
