

FLO LED

« FLO: LED clock to be plugged: no battery to change »

LED TECHNOLOGY

Low consumption

FLO LED clock combines technology and modernism: time is indicated as figures with blue LED and seconds are symbolised with points on the outline contour that appear gradually. In addition, it indicates the date and the temperature of the ambient air.

HIGH VISIBILITY

Readable from far away and in the obscurity

With the blue 6-cm-high figures, the FLO LED clock is readable in all circumstances day or night from far and near. Particularly recommended in office without access to the daylight or for people suffering altered vision.

QUIET

No hand = no noise

FLO LED clock does not make any noise as it is electronic which avoids ticking noise of conventional clocks which are disturbing concentration and productivity.

TECHNICAL FEATURES

Materials

Outline : aluminium

Cover: glass
