Country of Origin	Sweden
Product unit	Roll
Dimensions ¹	
Width	1300mm
Length	1700mm
Thickness	30 µm
Net weight/unit	~18,4kg/Roll
Base Polymer	LDPE, LLDPE
Additives	Antistat
Recycled material	Yes, 53% PIR
Recycling classification	100% Recyclable 
CO ₂ equivalents ²	1,060 kg/kg
Food Contact material	No ³
Fee level as stated by NPA ⁴	Green

STORAGE AND SHELF LIFE: Two years when stored at 23°C (73°F), 50% relative humidity, out of direct sunlight, in original packaging.

¹ All dimensions are in accordance with the general tolerances as defined by Alfapac AB in routine #1160 unless otherwise specified.

² The stated CO₂ value per kg refers to the total environmental impact that arises starting from the extraction of the oil used for the polymerisation process, until the finished raw material is ready to be sent to Alfapac. Some suppliers also provide CO₂ data for the delivery to Alfapac. For recycled materials, the environmental impact of the collection and regranulation processes, including any energy recovery of discarded material, refers to the environmental impact of the waste materials.

The value comes either directly from the producer, or from various publicly available sources, or based on Alfapac's own qualified assessments. Alfapac's policy document for the definition of these values can be distributed in the event of a separate question.

The value is our best assessment at the moment. However, as our suppliers refine their calculation models, these values will change. Therefore, the value given should be seen more as an indication rather than an absolute value, and as a piece of information with limited lifetime.

³ This product contains recycled raw materials that according to the material manufacturer have not been tested for contact with food. No migration tests for direct contact with food have been performed for the finished product of Alfapac.

⁴ Näringslivets Producentansvar i Sverige AB, "Criteria for green fee level for plastic packaging (Other than for private use)", version 1.2, updated 2024-04-22.
