

## Data Sheet for AirCap® ELRT

Co-Extruded plastic bubble film made from polyethylene with barrier layer. Polyethylene consists of minimum 50% recycled external regrind.

| Physical Properties               | Value          | Unit                    | Tolerance |
|-----------------------------------|----------------|-------------------------|-----------|
| Bubbel height (under compression) | 2.5            | mm                      | ±10%      |
| Bubble diameter                   | 9              | mm                      | -         |
| Surface density                   | 31             | g/m <sup>2</sup>        | ±10%      |
| Dimensions                        | -              | mm                      | ± 2%      |
| Amount of recycled content*       | 50             | wt% (weight percentage) | -         |
| Number of complete bubbles**      | 800            | -                       | -         |
| Color                             | As it comes*** | -                       | -         |

\* PIR or PCR

\*\* In an area of 300x300 mm

\*\*\* Predominately different shades of grey/black
