

DATA SHEET – XEROX PREMIUM TRANSPARENCIES

Description:-

- High clarity plain polyester face films, combined with paper backing types to suit various printer models
- Face films are mainly 100 micron, 140gsm. Dimensionally stable, with anti-static treatment
- Excellent transparency, print quality and projected images on OHP devices
- Good runnability in the xerographic copiers and printers
- Good flatness after printing
- Good toner/ink adhesion
- Backing papers are 70 gr/m² laser quality
- Specific grade for Inkjet printing

Compatibility:-

- Premium Universal range suitable for colour and mono-chrome dry toner (laser/LED/flash fusion) print processes
- Premium Colour optimised for the highest quality colour dry toner print processes
- Premium Mono designed for mono/black printing only
- Premium Colour Inkjet for desktop inkjet office printers

Applications:-

- Overhead transparency projections
- Report covers and dividers

Range Overview

Xerox Premium Transparencies Universal				
Xerox Code	Format	Film Type	Thickness	Sheets/pack
