Re: EU 10 / 2011 and FDA 21 CFR 181.32

Product: ATHLONExtrusions ABS and HIPS products – B351M-FG, B351SM-FG, P90-FG and P90M-FG

Further to your recent query, Athlone Extrusions Ltd is pleased to announce that ATHLONExtrusions HIPS and ABS can meet both the EC Directive EU 10 / 2011, EU 1935/2004 and FDA Food Additive Regulation 21 CFR 181.32 which relates to plastic materials and articles that intend to come into contact with foodstuffs. The onus is on the customer to specify a colour formula that has approval to these standards at colour match stage.

Once that is done then the ATHLONExtrusions product should have approval to these standards.

Please do not hesitate to contact us should you require additional information.
